

AVOIDING SNAKES AND PREVENTING SNAKEBITE: HOUSE

Where might snakes hide in your house?
How do they get in?

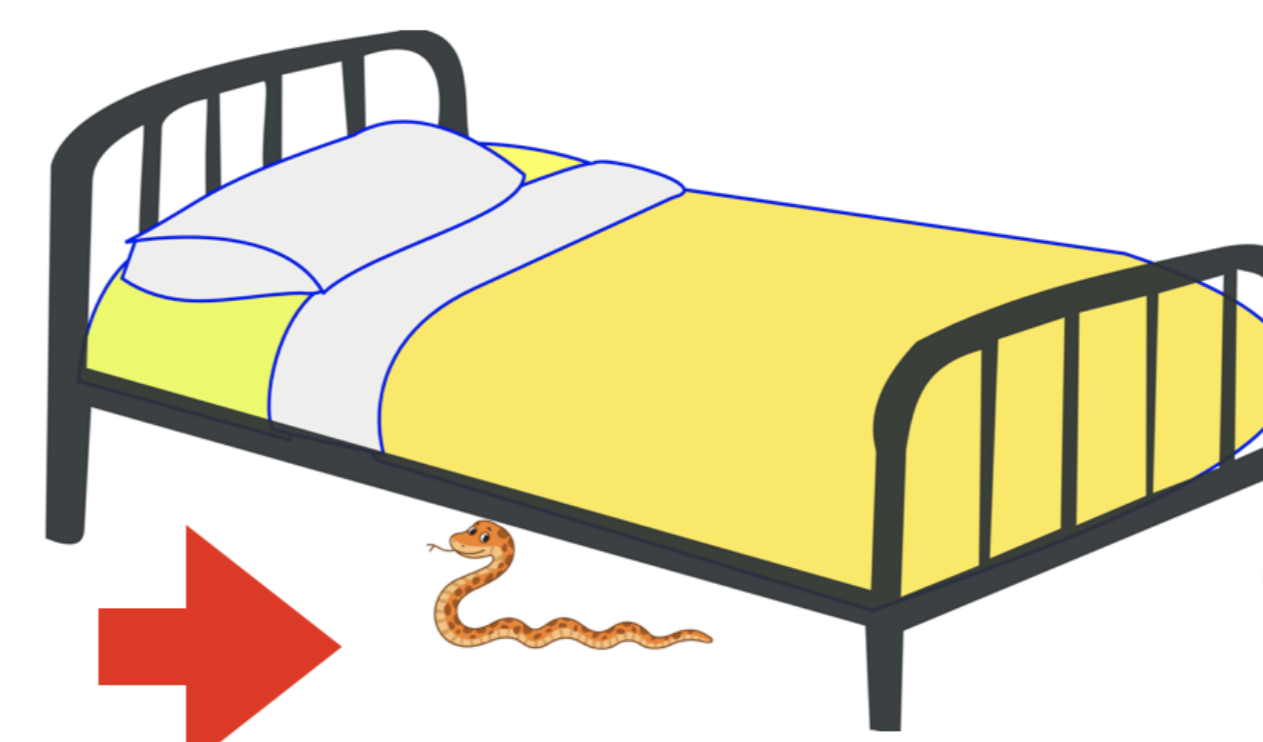

How can snakes get into this room?
Why would they want to enter this room?

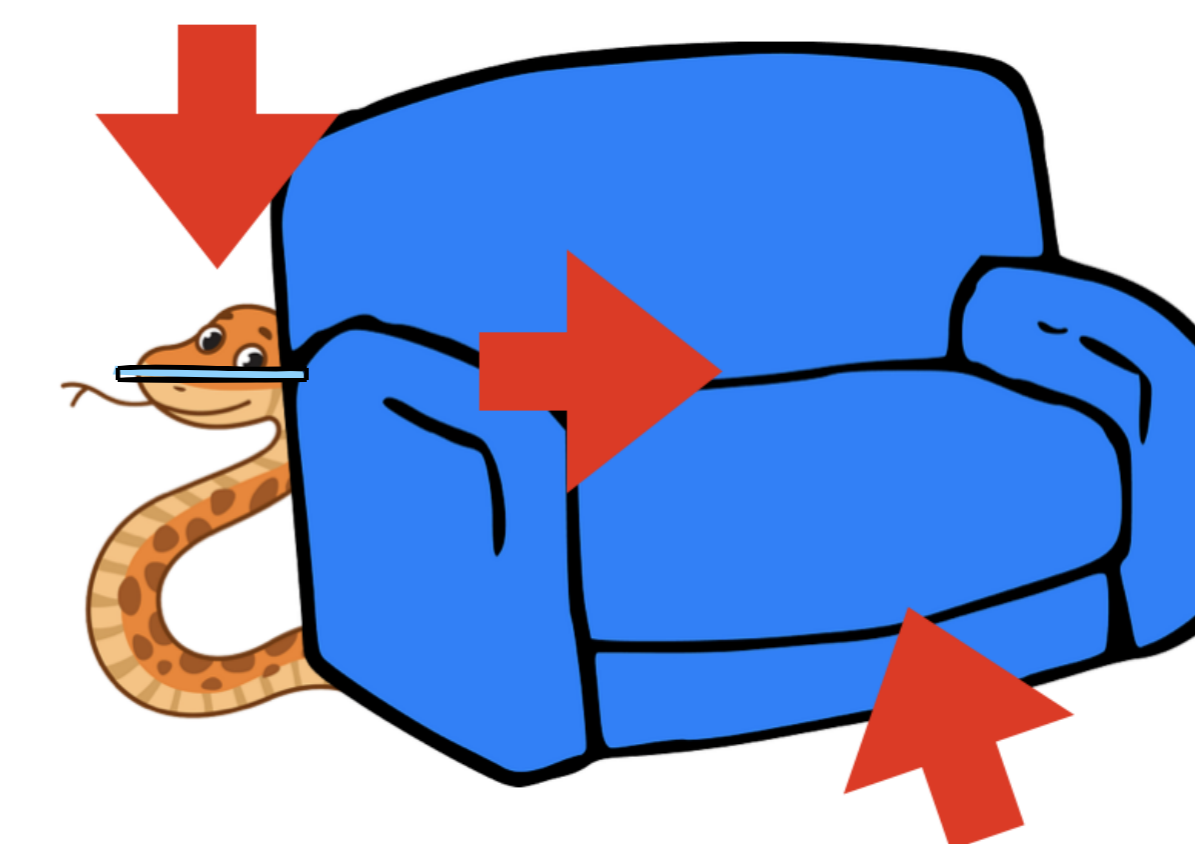

They can be on the floor, so try not to sleep on the floor if possible

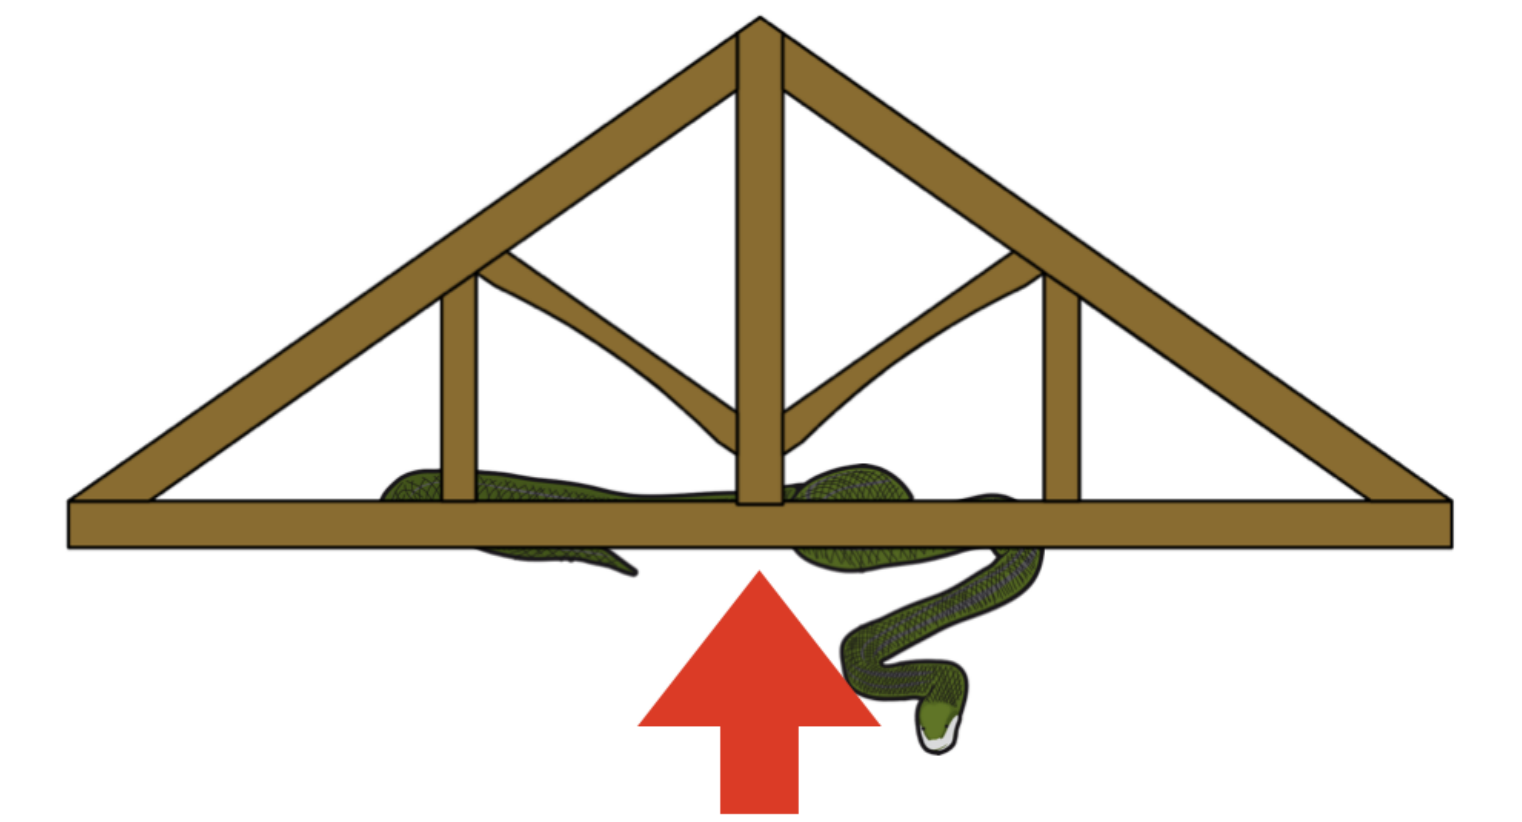

Check these things at night before you go to sleep and when you get up in the morning

Under bed and under sheets

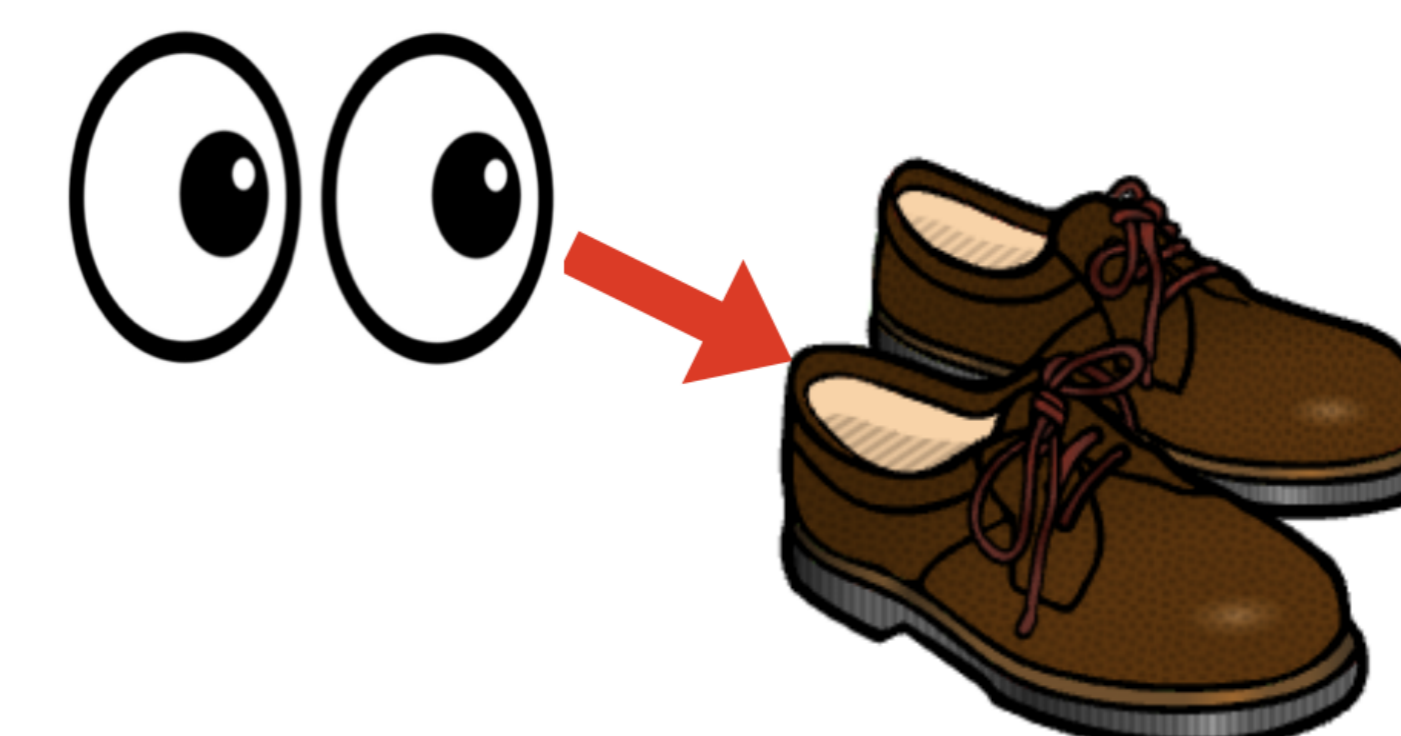

Under and behind furniture and in seat cushions

In the roof supports

Under piles of clothes

Inside your shoes (especially tall)
